

The Priory Primary School – Dip And Do Home Learning

Get Electronic:

What are the 10 most endangered animals on the planet right now? Use the Internet to find out.

- Choose one of the endangered animals to research further.
- Try to find out where it lives and the reasons why the species is endangered.

Make a PowerPoint presentation about your chosen animal and upload it to Seesaw.

Get Researching:

Watch the inspirational message from Sir David Attenborough using the link below:
<https://www.youtube.com/watch?v=IW3jEiYBFzg>

Then visit: bbc.co.uk/plasticswatch to research how other people are waging a war on plastic.

Get Experimenting:

Everything that lives (including you!) needs water to survive. So, it's important to think about ways to conserve water.

Can you cut down the water you use in sensible ways, such as turning off the tap when brushing your teeth or collecting rainwater to water your flowers?

Get Cooking:

Get cooking for the birds! Use this link to learn how to make a yoghurt pot bird feeder full of scrumptious treats for our feathered friends while also finding a great use for those yoghurt pots that might otherwise go in the bin!

<https://www.youtube.com/watch?v=zkJMyMvidf4>

Get Writing:

Write a poem about Planet Earth. It can take any form you like but you may want to experiment with haikus and tankas as we have studied them in year 3.

Illustrate your poems and bring them to school for our dip and do display board.

Fragile Earth

Do we need to look after Planet Earth?

Get Mathematical:

How many items in your house use electricity? Which rooms are they in? Record your results in a tally chart like the one below:

Room	Number of electrical items
bedroom	
kitchen	
living room	

Saving power is good for the planet. Turn off lights & other items when you leave the room/ have stopped using them!

Get Thinking:

<https://www.youtube.com/watch?v=VUUUxOI715s>

Watch the fun video about plastic on the link above.

Now think... could you and your family do more to recycle, reuse or reduce your use of plastic?

Get Creative:

Recycling means turning old, used-up products into something new.

Can you save some items from the garbage by using them for junk modelling? Try to make a beautiful sculpture from items that otherwise would have gone to landfill.

Get Active:

Have a good look around your local area. Is litter a problem where you live? Perhaps you could go litter picking with your parents.

But remember to have a chat about how to do this safely before you set off.

Get Performing:

A monologue is when a performer gives a very long speech on stage.

Can you perform a monologue about why we should help to save our planet and how we could go about it? We would love to see your monologues on Seesaw.

Year 3– Summer Term - DIP INTO THE ACTIVITIES ABOVE WITH YOUR CHILD. YOU DON'T HAVE TO DO THEM ALL! YOUR CHILD CAN PRESENT THEIR LEARNING IN A WAY THAT THEY WOULD LIKE (BE IMAGINATIVE!) AND BRING IT INTO SCHOOL AS THEY COMPLETE IT TO SHARE WITH THEIR CLASS. ALL ACTIVITIES ARE OPTIONAL.
