Year R Newsletter: 6<sup>th</sup> May 2022

## What have we been learning about in Year R this week?

We began the week by using our imagination to write about what we would like in our own bucket. We discussed our ideas as a whole class before writing down our ideas. The children have also been busy creating their own Billy's Bucket stories.

In our art the children have created their own buckets, made a variety of different sea animals and used coloured sands to create some shells.

In Maths we have been continuing to practise our recognition of numbers 10-20. The children have been using 2 ten frames to represent 20 and have been practising number recognition using ten frames and cubes.

## Next week:

The children will be learning about sea animals. They will be finding out some interesting facts about different sea animals through watching videos and books. The children will practise reading simple sentences and matching them to the correct pictures. They will also choose their favourite sea animal fact, which they will write down. We will then make our own class sea animal fact book, which the children will be able to look at in our book corner.

We will also be using the VR headsets to have some wonderful adventures with different sea animals.

In Maths the children will be exploring 2D shapes and discussing different sized containers and thinking about how many objects can fit in each container.

Please could you make sure that all water bottles and jumpers are labelled. As the weather gets warmer the children will be taking their jumpers off and will get easily lost if they are not named.

Have a lovely weekend.

The Year R team
